

AXA Commercial Construction – Annuals

Our dedicated construction underwriting team has been strengthened, with the addition of four new lead trading underwriters. With their deep understanding of the construction industry, they can create bespoke solutions tailored to meet your customer's needs.

Our appetite

- We have a very wide appetite in the construction space and are particularly keen to write more: building contractors, developers and renovators; ceiling and partition erectors; cladding – fascia and guttering installation; electrical contractors; glazing and double glazing installers; plant hirers; heating and air-conditioning installation engineers and shop fitters.
- AXA's Contractors Combined policy wording is designed to suit the needs of contractors and is specific to particular sectors.
- We can also consider broker facility wordings where appropriate.
- Cover extensions are automatically built into wordings with flexible extension limits displayed clearly on the schedule specific to your customers' needs.
- Clients have unlimited access to legal and tax advice, emergency and lifestyle counselling helplines and online counselling support.
- Long term agreements, low claims rebates and risk management bursaries can be agreed.
- We also offer access to a specialist construction training course which brokers and their staff can benefit from Brokerwise

Tailored Sector Cover

Contractors all risks – annual contract

- Permanent or temporary works
- Own and hired in plant cover
- Expediting costs cover
- DE3 as standard with DE4/5 optional
- Offsite storage cover
- Re-drawing plans or documents cover
- Show houses and contents cover
- Speculative development cover

Public liability (building and allied trades)

- Part products cover
- Temporary JCT 6.5.1.

Risk Management & Claims

- We have dedicated Risk Engineers that understand the risks and challenges present within the construction sector.
- Surveys will be undertaken by trained surveyors who will produce specialist reports and work with you to support risk management improvements.
- Our Risk Engineers can also support clients with training requirements including manual handling training and safer working environments.
- Claims relationship managers are on hand to analyse claims trends and support complex claims and for our bigger construction clients, you will have access to a dedicated claims contact.
- Access to eServe; our online claims tracking tool ensuring you can keep up to date on claims.

Contact

Please reach out to your local Branch contact to discuss any risks or queries you have on our Construction offering or visit our **Construction page** to find out more.
