

Bold new horizons

AXA International Services

AXA International Services is designed for clients with UK premiums of £10k and above.

We recognise and understand that business is increasingly global and that your clients will require a compliant insurance solution to meet their needs as their business grows overseas.

AXA International Services can help you and your clients on that journey by tailoring a solution for their expanding business.

Solutions are available on either an integrated or a local standalone basis and are offered throughout the AXA International Network.

Why choose AXA?

The AXA International Network is present in over 150 countries worldwide and is made up of AXA Group companies and carefully selected network partners.

You can be assured that whichever option you choose with AXA International Services, it will be fully compliant with local laws, taxes and compulsory pools. Crucially your local subsidiary will have a policy in their own language.

Our principle overseas offering is a fully integrated solution however for those clients who prefer to let their subsidiaries make their own insurance arrangements we can help you to coordinate a local standalone solution with the AXA International Network.

In addition to their UK policy, your client will have a locally compliant policy issued wherever their subsidiary companies are located. Some of the key benefits are:

Global standard of cover on a programme underwritten centrally in the UK.

All terms, conditions and rating are negotiated between us.

Claims handled locally by teams that understand that your policy is part of a global programme.

As far as possible, cover designed to be replicated across all countries.
