

Coronavirus Response

Covid-19 deep cleaning and decontamination services

As business premises and facilities begin to reopen, deep cleaning and decontamination are essential in reducing the risk of transmission and further spread of Covid-19.

Whilst this can be conducted in-house, employing a specialist service provides vital reassurance for business owners, customers and employees.

Crawford’s Contractor Connection provide trusted, licensed and approved cleaning experts, with the professional equipment needed to clean and restore sites of any size or complexity, including:

- **Initial preventative cleaning.**
- **Recurring decontamination services, focusing on high-traffic areas and regularly used surfaces.**
- **Emergency decontamination following a confirmed exposure, supported by a 24/7 call centre and two-hour emergency response time.**

After the initial clean there is also the option for training of in-house teams to conduct ongoing cleaning and decontamination, including techniques, key areas of focus and advice on chemical usage.

Customised programme

Following a free survey, a customised programme will be agreed from a range of potential solutions:

Electrostatic Disinfectant	<ol style="list-style-type: none"> 1. Wipe down of touchpoints. 2. Easy to apply, electrostatically charge disinfectant delivering an ionised 40-micron layer that fully and evenly coats all surfaces. 3. The electrostatic spray repels pathogens, providing longer lasting protection, and is naturally non-toxic. 4. Self-certification of work with additional swab test certification option via accredited laboratories.
Biohazard cleaning	<ol style="list-style-type: none"> 1. Break - Disinfectant spray applied to required areas. 2. Treat - Wipe down of surface areas and touchpoints. 3. Prevent - Disinfectant spray applied, fogger for 72-hour bio protection to required areas. (This can be provided as a repeated “maintenance solution” with ongoing applications every 72 hours and includes register of compliance). 4. Self-certification of work completed.

Coronavirus Response

Additional Services	<ol style="list-style-type: none"> 1. Fleet Vehicle cleaning. 2. Installation of hand sanitizer dispensers at key entry points. 3. Chaperone services to assist specialist contractors completing emergency or essential works.
Decontamination	<ol style="list-style-type: none"> 4. Sterilisation of ventilation systems, safe removal / disposal of contaminated items as clinical waste. 5. Certification via accredited laboratories.

Specialist contractors

- All contractors have been audited through a six-stage process and hold relevant Decontamination and HSE certification.
- Full Risk Assessment Method Statement (RAMS) documentation for all works is provided, along with COSHH data sheets for all chemical agents utilised.
- All insurances are vetted, current and approved.
- Only approved chemical agents are used during the cleaning process - solutions are colourless, with a near odourless scent, allowing businesses to operate as normal.
- Any infected areas are sealed off and all surfaces and the air cleaned, to effectively bring any epidemic under control.
- Cleaning certification / confirmation is provided, with additional accredited laboratory testing where required.

Illustrative costs

Whilst prices are quoted on an individual basis, these are representative charges for cleaning and electrostatic disinfectant application:
